A message to everyone - act now

Everyone should be aware of the fact that Lockheed Martin UK, a subsidiary of the world's second largest arms producer, are helping to run the census.

In addition to this, whilst the government may claim that the census is vital for the planning and funding of community services, there are no questions relating to income and only one relating to disability. With such gaping holes in the information requested how can such claims be taken seriously?

Count Me Out have provided this alternative form for you to write the questions and answers you think should be in the census -instead of the highly political ones in the official form.
